

An Open Source Testing Ecosystem

"The world is changing very fast. Big will not beat small anymore. It will be the fast beating the slow" – by Rupert Murdoch 21st Century Fox. TestOnNeed is created for Entrepreneurs and organizations such as Startups and Enterprises seeking winning formula to bring their products, solutions, and services to the market fast to beat the slow.

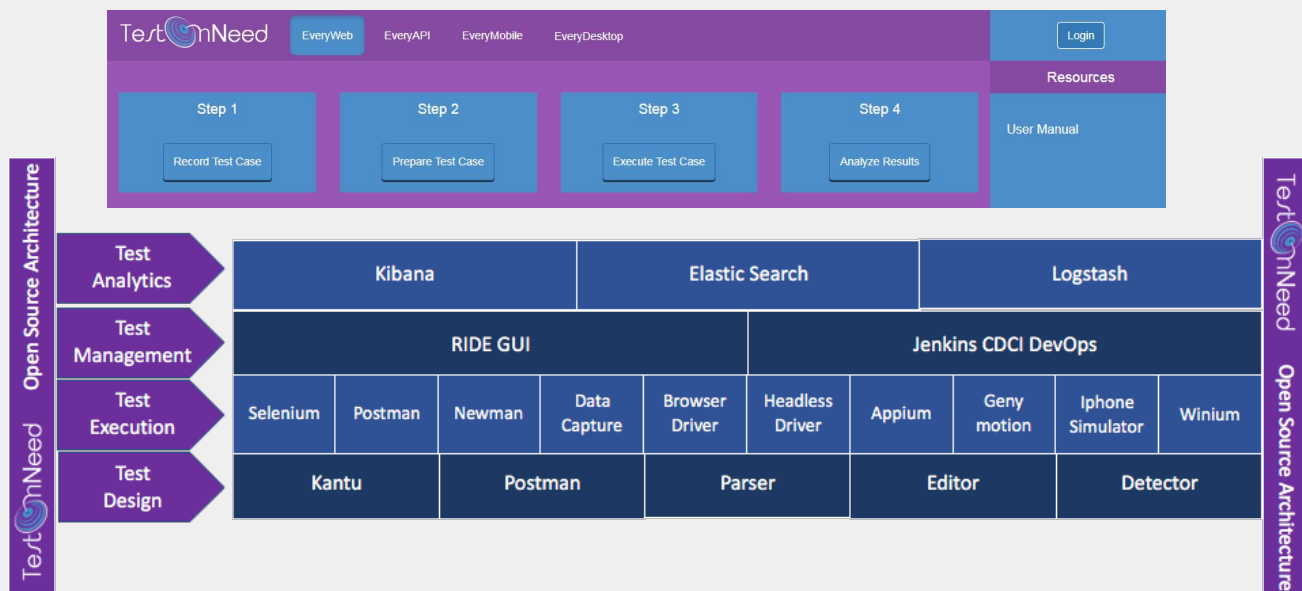

TestOnNeed is an on-need QA test solution that enables you to discover defects in your applications that affect your customer experience before and after deploying in production. We better the speed, scale, coverage, and quality of Blockchain, Artificial Intelligence (AI), Internet of Thing (IoT), Mobile Edge Computing (MEC), Cloud, Augmented Reality (AR), and Virtual Reality (VR) applications. We do it all with a belief in three core values. They are:

An Online '**On Need**' Testing Platform - A belief, to give easy access to the platform that provides expert advice, test tools, and highly skilled test resources.

An Open Source Testing Ecosystem - A belief, to provide an easy to use and a completely open source test solution by bridging multiple open source testing tools and community.

A DevOps and TestOps Enabler - A belief, to prepare an organization in the world of continuously changing technology by enabling end to end DevOps and TestOps practice.
